Finding Your Ring Size

START HERE

Begin by printing this page out. Make sure the page scaling is set to none and you are printing this page at 100%. The bar to the right should measure exactly 3" inches. Ok now onto the fun stuff!

This should be exactly three inches

METHOD No. 1

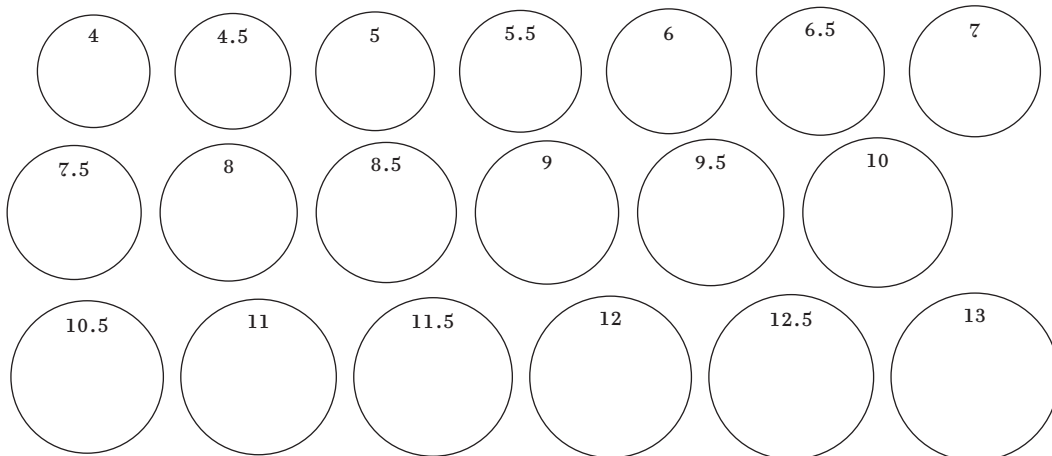

1. After printing this page cut the ring sizer below out.
2. Wrap the sizer around the finger. *You want it snug but not super tight. Just think about how you want your ring to fit.
3. Your size will be the number the closest to the arrow end of the sizer.

*It is super helpful to have a buddy give you a hand (literally!) with this part of the sizing.

METHOD No. 2

If you have a ring that you like the fit place it over the ring outlines below. Make sure the outer edge of the circle matches the inside edge of the ring.

METHOD No. 3

Measure the circumference of your finger with a piece of string. The length of the string corresponds to the ring size.
